

How player stats relate to NBA salary

2022-23 NBA salary sample | Three separate regressions; inputs selected independently within each position

How to read: for the increase at left, each cell estimates the salary difference among NBA players in that position, after accounting for the other factors included in its model. These are associations, not guaranteed raises. **+5 percentage points** means, for example, 35% shooting becomes 40%.

Input / stated increase	Guards 197 NBA players	Wings 91 NBA players	Bigs 178 NBA players
Height +1 inch	9.0% higher modeled salary 95% range: -3.6% to +23.3% Uncertain adjusted p 1.0000	13.5% higher modeled salary 95% range: -6.8% to +38.1% Uncertain adjusted p 1.0000	6.1% higher modeled salary 95% range: -6.2% to +20.1% Uncertain adjusted p 1.0000
Rebounds per game +1 rebound/game	3.2% higher modeled salary 95% range: -24.8% to +41.7% Uncertain adjusted p 1.0000	Not included in this model No salary estimate No interval or p-value	20.4% higher modeled salary 95% range: +9.8% to +31.9% Supported adjusted p 0.0035
Assists per game +1 assist/game	13.8% higher modeled salary 95% range: -5.9% to +37.7% Uncertain adjusted p 1.0000	34.4% higher modeled salary 95% range: +10.1% to +64.1% Uncertain adjusted p 0.1435	10.8% lower modeled salary 95% range: -40.5% to +33.7% Uncertain adjusted p 1.0000
Steals per game +0.5 steals/game	19.0% lower modeled salary 95% range: -58.0% to +55.9% Uncertain adjusted p 1.0000	102.7% higher modeled salary 95% range: -0.8% to +314.3% Uncertain adjusted p 1.0000	134.1% higher modeled salary 95% range: -7.5% to +492.6% Uncertain adjusted p 1.0000
Blocks per game +0.5 blocks/game	71.6% higher modeled salary 95% range: -27.4% to +305.8% Uncertain adjusted p 1.0000	48.0% lower modeled salary 95% range: -87.5% to +116.8% Uncertain adjusted p 1.0000	12.6% higher modeled salary 95% range: -13.0% to +45.6% Uncertain adjusted p 1.0000
Effective field goal percentage +5 percentage points	10.7% higher modeled salary 95% range: -14.9% to +44.1% Uncertain adjusted p 1.0000	3.4% higher modeled salary 95% range: -22.1% to +37.4% Uncertain adjusted p 1.0000	4.9% lower modeled salary 95% range: -18.5% to +10.8% Uncertain adjusted p 1.0000
Three-point percentage +5 percentage points	3.7% lower modeled salary 95% range: -24.6% to +23.1% Uncertain adjusted p 1.0000	10.1% lower modeled salary 95% range: -43.1% to +42.1% Uncertain adjusted p 1.0000	4.4% higher modeled salary 95% range: -2.5% to +11.8% Uncertain adjusted p 1.0000
Free throw percentage +5 percentage points	3.3% lower modeled salary 95% range: -11.3% to +5.5% Uncertain adjusted p 1.0000	0.4% higher modeled salary 95% range: -17.0% to +21.4% Uncertain adjusted p 1.0000	0.3% higher modeled salary 95% range: -10.5% to +12.4% Uncertain adjusted p 1.0000
Three-point attempts per game +1 three-point attempt/game	31.0% higher modeled salary 95% range: +14.1% to +50.6% Supported adjusted p 0.0058	21.1% higher modeled salary 95% range: +3.7% to +41.5% Uncertain adjusted p 0.5436	6.0% higher modeled salary 95% range: -9.1% to +23.6% Uncertain adjusted p 1.0000
Turnovers per game Not tested in salary regression	Prediction input only No salary estimate No interval or p-value	Not included in this model No salary estimate No interval or p-value	Not included in this model No salary estimate No interval or p-value

Supported: adjusted p $\leq$ 0.05 after Holm correction for the original 36 candidate tests (2 of 26 fitted associations). **Uncertain:** evidence does not meet that threshold, even if the estimate is large. It does not prove there is no association. Shaded cells are supported.

95% range: a pointwise confidence interval for the estimated association; minus means lower salary and plus means higher. Percentages convert salary-regression (OLS) coefficients using $100 \times (\exp(\beta) - 1)$; they are not ridge prediction weights or shares of player value. Raw coefficients remain in the dashboard.

Scope: each position has different adjustment factors; comparing columns alone does not prove different priorities. These exploratory NBA results do not validate NCAA or WBB pay. Sources: supplied 2022-23 salary workbook; ESPN heights retrieved September 2026, not verified 2022-23 measurements. Methods and direct position tests: dashboard Full statistical details.
