

NBA coefficients by position

2022-23 NBA salary sample | Removed by VIF <= 5 rule: minutes/game, points/game, rebounds/game, turnovers/game

Weight: ridge prediction coefficient per 1 standard deviation (SD), used in the NCAA peer signal. **OLS beta:** separate log-salary coefficient for the stated increase. **Intervals and p-values apply only to OLS beta.** Neither number is a percentage of player value.

Input / stated increase	Guards Ridge / OLS n: 198 / 197	Wings Ridge / OLS n: 91 / 91	Bigs Ridge / OLS n: 178 / 178
Height +1 inch	Weight +0.190 OLS beta +0.090 95% beta CI: [-0.018, +0.199] p 0.1032 Holm p 1.0000	Weight +0.100 OLS beta +0.127 95% beta CI: [-0.070, +0.323] p 0.2038 Holm p 1.0000	Weight +0.184 OLS beta +0.096 95% beta CI: [-0.028, +0.220] p 0.1267 Holm p 1.0000
Assists per game +1 assist/game	Weight +0.309 OLS beta +0.138 95% beta CI: [-0.033, +0.309] p 0.1141 Holm p 1.0000	Weight +0.366 OLS beta +0.296 95% beta CI: [+0.096, +0.495] p 0.0042 Holm p 0.1477	Weight +0.108 OLS beta +0.029 95% beta CI: [-0.378, +0.437] p 0.8875 Holm p 1.0000
Steals per game +0.5 steals/game	Weight -0.119 OLS beta -0.204 95% beta CI: [-0.847, +0.438] p 0.5310 Holm p 1.0000	Weight +0.387 OLS beta +0.707 95% beta CI: [-0.008, +1.422] p 0.0527 Holm p 1.0000	Weight +0.533 OLS beta +1.032 95% beta CI: [+0.112, +1.951] p 0.0281 Holm p 0.9001
Blocks per game +0.5 blocks/game	Weight +0.263 OLS beta +0.562 95% beta CI: [-0.211, +1.334] p 0.1531 Holm p 1.0000	Weight -0.082 OLS beta -0.655 95% beta CI: [-2.083, +0.774] p 0.3644 Holm p 1.0000	Weight +0.272 OLS beta +0.301 95% beta CI: [+0.036, +0.566] p 0.0265 Holm p 0.8740
Effective field goal percentage +5 percentage points	Weight +0.237 OLS beta +0.104 95% beta CI: [-0.163, +0.371] p 0.4416 Holm p 1.0000	Weight -0.047 OLS beta +0.034 95% beta CI: [-0.250, +0.318] p 0.8139 Holm p 1.0000	Weight -0.062 OLS beta -0.043 95% beta CI: [-0.180, +0.093] p 0.5324 Holm p 1.0000
Three-point percentage +5 percentage points	Weight -0.035 OLS beta -0.037 95% beta CI: [-0.280, +0.206] p 0.7639 Holm p 1.0000	Weight -0.095 OLS beta -0.107 95% beta CI: [-0.564, +0.351] p 0.6442 Holm p 1.0000	Weight +0.097 OLS beta +0.039 95% beta CI: [-0.024, +0.101] p 0.2223 Holm p 1.0000
Free throw percentage +5 percentage points	Weight -0.075 OLS beta -0.034 95% beta CI: [-0.125, +0.056] p 0.4548 Holm p 1.0000	Weight +0.109 OLS beta +0.004 95% beta CI: [-0.187, +0.194] p 0.9691 Holm p 1.0000	Weight +0.005 OLS beta +0.008 95% beta CI: [-0.111, +0.127] p 0.8966 Holm p 1.0000
Three-point attempts per game +1 three-point attempt/game	Weight +0.547 OLS beta +0.276 95% beta CI: [+0.143, +0.410] p 6.83e-05 Holm p 0.0025	Weight +0.360 OLS beta +0.192 95% beta CI: [+0.036, +0.347] p 0.0165 Holm p 0.5600	Weight +0.134 OLS beta +0.080 95% beta CI: [-0.083, +0.242] p 0.3331 Holm p 1.0000

1 of 24 retained OLS associations meet Holm p <= 0.05 using the original 36-candidate correction family. Excluded means not retained, never a zero effect. Age and percentage-availability controls are outside this basketball-input table.

Interpretation: a positive salary coefficient does not show that a stat helps winning; per-game turnovers can also track workload. Redundancy screening and coefficient inference remain exploratory. These NBA results do not validate NCAA or WBB pay.

Sources: supplied 2022-23 NBA salary workbook; ESPN heights retrieved September 2026, not verified 2022-23 measurements. Full selection policy, excluded inputs, and model checks are in the dashboard's Full statistical details.
